Ultra Small Surface Mount Coaxial Connectors - 1.9mm or 2.3mm, 2.4mm Mated Height

U.FL Series

Up to 6GHz

■Features

1. Nominal mated height of 1.9 or 2.3mm, 2.4mm (Max. 2.0 or 2.4mm, 2.5mm)(Fig.1)

2. Small mounting area

The receptacle occupies an area of 7.7mm².

3. Light weight

Receptacle: 15.7mg

4. Supports high frequency up to 6GHz

To meet the frequency requirements of a wide variety of miniature devices, the connectors offer high frequency performance from DC to 6GHz, with a V.S.W.R. of 1.3 to 1.5 max.

5. Automatic board placement

Packaged on tape-and-reel the receptacles can be placed with vacuum nozzles of the automatic placement equipment.

6. Plugs are terminated with ultra-fine coaxial (fluorinated resin insulated) cable

Standard ultra-fine coaxial cable of 0.81mm diameter (single braid shielding) is used for the plug termination, assuring secure and stable connections.

7. Simple connector mating / unmating

Use of available extraction tool assures correct disconnection of the plug and receptacle.

8. Verification of the fully mated condition

Tactile click sensation confirms fully mated condition, assuring complete electrical and mechanical connection.

9. Halogen-free*(Receptacle,plug(HF type))

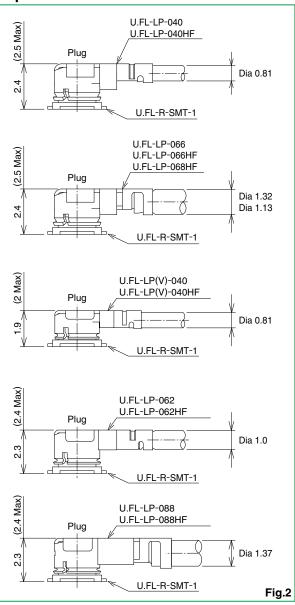

*As defined by IEC61249-2-21

Br-900 ppm maximum, Cl-900 ppm maximum, Cl+Br combined-1,500 ppm maximum

Applications

Mobile phones, wireless communication devices, electronic measuring instruments, GPS, wireless LAN, Bluetooth and any application requiring high frequency transmission using small coaxial connectors.

Space Factor of Mated Connector

*V.S.W.R. Measurement System

The above V.S.W.R. standard values were measured using the measurement connection shown below.

- Note 1: Cable type connectors were measured with SMA conversion adapters attached to both ends of the harness product of a suitable 100cm cable.
- Note 2: Board type connectors were mounted to a $50\Omega\mbox{ glass epoxy}$ board and measurements were conducted with SMA conversion adapters attached.

■Conversion Adapters

●SMA Conversion Adapter (Mating portion: U.FL side jack - SMA side plug)

Note: The U.FL side mating portions has a lower lock retention force than the regular product, therefore, cannot be used for purposes other than performance measurements.

SMA Conversion Adapter (Mating portion: U.FL side plug - SMA side jack)

Note: The U.FL side mating portions has a lower lock retention force than the regular product, therefore, cannot be used for purposes other than performance measurements.

SMA Conversion Adapter (Mating portion: U.FL side plug - SMA side jack)

Note: This connector is used by compressing the mated portion of U.FL side onto the U.FL-R-SMT-1 portion.

■Receptacle to Inspection

This receptacle is used for inspecting the continuity, withstand voltage, and other aspects of the harness product.

▶ Plug Extraction Tool

This tool is used for extraction from a mating condition.

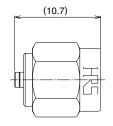

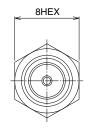

Note: Part No. U.FL-LP-N-2 for U.FL-LP-040/066/088. Part No. U.FL-LP(V)-N-2 for U.FL-LP(V)-040/U.FL-LP-062.

▶ Plug Insertion Tool

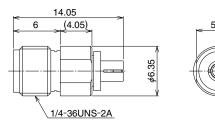

This tool is for mating U.FL series plug into receptacle.

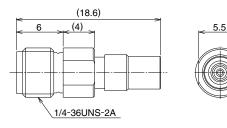

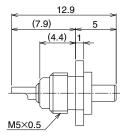

Part No.	HRS No.	RoHS

U.FL-LP-N-2	331-0494-5)
U.FL-LP(V)-N-2	331-0493-2	

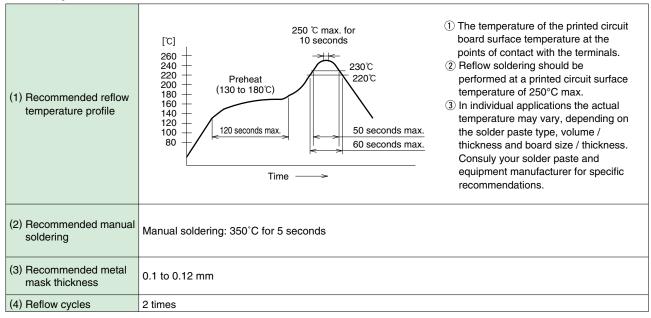

● Usage Precautions

1. Plugs

(1) Mating / unmating	1) To disconnect connectors, insert the end portion of U.FL-LP-N-2 and U.FL-LP(V)-N-2 under the connector flanges and pull off vertically, in the direction of the connector mating axis. 2) To mate the connectors, the mating axes of both connectors must be aligned and the connectors can be mated. The "click" will confirm fully mated connection.Do not attempt to insert on an extreme angle. U.FL-R-SMT-1	
(2) Pull forces on the cable after connectors are mated.	After the connectors are mating, do not apply a load to the cable in excess of the values indicated in the diagram below. U.FL-LP Cable Assembly 1N max (U.FL-LP(V)-040, U.FL-LP-062) 2N max (U.FL-LP-040, U.FL-LP-066, U.FL-LP-088) 3N max (U.FL-LP(V)-040, U.FL-LP-062) 4N max (U.FL-LP-040, U.FL-LP-066, U.FL-LP-088) 1N max (U.FL-LP(V)-040, U.FL-LP-066, U.FL-LP-088)	
(3) Precautions	Do NOT forcefully twist or deform wires.	

2. Receptacles

3. Operating environment and storage conditions

	The connectors are not designed to operate in the following environments:
	Exposed to a excessive amounts of fine particles and dust
(1) Operating environment	Regions and places having a high density of sulfur dioxide, hydrogen sulfide, nitrogen dioxide or other corrosive
-	gasses.
	Environments having large rapid variations in temperature.
	Store in the Hirose Electric packaging.
(2) Storage conditions - Receptacle	Temperature: -10 to +40°C, Humidity: 85% max.
	Use within 6 months of delivery.
	Receptacles for which the storage period has elapsed must be tested for solderability to the PC board
	mounting surface.
